# GOKUL M

Aspiring Full-Stack Developer (MERN Stack) | AI & Data Science Student

+91 9342099745 | gokulxmg26@gmail.com | LinkedIn: GOKUL M | GitHub: gokulm-dev-official

## Profile Summary

I am GOKUL M., a passionate and motivated Software Developer Fresher with a strong foundation in programming and full-stack application development. I am skilled in Java, Python, C, SQL, and Dart (Flutter), with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js) and core web technologies including HTML, CSS, and JavaScript. I enjoy building scalable web and mobile applications and solving real-world problems through clean and efficient code. I am eager to contribute to innovative software solutions while continuously learning and growing in a dynamic tech environment.

## Technical Skills & Soft Skills

**Programming Languages:** Java, Python, C, Dart (Flutter)
**Web Technologies ( MERN Stack ):** HTML, CSS, JavaScript, React.js, Node.js, Express.js
**Mobile App Development:** Flutter
**Data Visualization & BI Tools:** Power BI, Tableau
**Database Management:** MySQL, MongoDB
**Other Skills:** REST API Integration, Git & GitHub, Version Control
**Soft Skills**: Problem-Solving, Critical Thinking, Time Management, Leadership

## Projects

**AI-Powered Lung Disease Detection Platform ( MERN Stack )** | Live Link

Developed a scalable web architecture using React and Node.js for automated Chest X-ray analysis and patient diagnosis.

•Integrated a TensorFlow deep learning model into a Node.js backend to provide instant classification of COVID-19, Pneumonia, and Tuberculosis.

•Architected a secure Patient Management System with MongoDB to store medical history and diagnostic reports.

•Designed a high-performance dashboard using Framer Motion and Recharts for visualizing clinical data and disease trends.

•Tech Stack: MongoDB, Express.js, React, Node.js, TensorFlow.js, Tailwind CSS, Framer Motion.

---

**DataVision-AI | AI Automatic Data Analysis & Report Generator** |

An AI-powered platform for automated dataset analysis and insight generation. It performs real-time data summarization, visualization, and PDF report generation without manual intervention.

- Developed end-to-end AI data analytics system for automated dataset interpretation and visualization.
- Integrated real-time PDF/CSV report generation with advanced data insights.
- **Tech Used:** Python, FastAPI, Pandas, Plotly, TailwindCSS, OpenAI API

**License Plate Detector** |

A real-time vehicle license plate recognition system capable of detecting and extracting plate numbers from live camera feeds.

- Utilized OpenCV for object detection and image preprocessing.
- Implemented Tesseract OCR for accurate text extraction from plates.
- Optimized detection accuracy under varying lighting and motion conditions.
- **Tech Used:** Python, OpenCV, Tesseract OCR

---

**Rido App – 3rd Prize Winner at Payoda Hackathon** |

A ride-sharing safety application ensuring secure travel for drivers and passengers.

- Designed dual login modules for driver and passenger with secure authentication.
- Integrated real-time tracking and an SOS emergency feature for enhanced safety.
- Developed using Flutter for the frontend and Java (Spring Boot) for the backend.
- **Tech Used:** Java, Spring Boot, Flutter, Google Maps API

## Education

---

**B.Tech – Artificial Intelligence and Data Science**
Excel Engineering College, Namakkal
2023 – 2027 *(Expected)*
CGPA: **8.3 / 10**

**HSC – Higher Secondary Certificate**
Government Higher Secondary School, Thuttampatti
Year of Passing: **2023**

**SSLC – Secondary School Leaving Certificate**
Government Higher Secondary School, Thuttampatti
Year of Passing: **2021**

## Languages

---

Tamil

English
